

Help Us Pave the Way to an Important “Baby Brain” Study

UC San Diego
SCHOOL OF MEDICINE

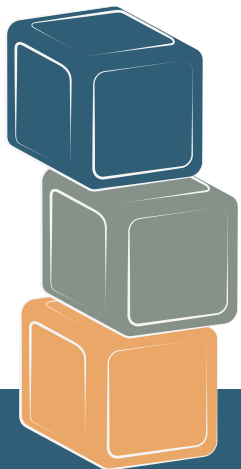

The first few years of life are a period of exponential brain growth and development but there is still so much we do not know about the effects of early exposures on infant and child development.

We are looking for parents of children who are between 0-24 months of age to participate in planning the future of the **HEALthy Brain and Child Development (HBCD) Study** to answer these important questions.

Please consider participating in our Child MRI Scan

Have an MRI scan of your child's brain to help us learn the best techniques for conducting MRIs on infants and toddlers.

Participants
will be
compensated
for their time
and travel.

To participate or learn more, please contact
us at (858) 822-3682 or HBCD@ucsd.edu or visit
